

TABLE 1 Patient characteristics at time of fecal collection, stratified by CD4 lymphocyte count

Characteristic	Total	CD4 lymphocyte count at time of fecal collection			p*
		< 350 cells/ μ L (low)	> 350 cells/ μ L (high)		
number of participants (%)	49 (100)	14 (28.6)	35 (71.4)		
Female (%)	5 (10.2)	1 (7.1)	4 (11.4)		0.654
Age at time of fecal collection (years) [median (IQR)]	48 [39-61]	57 [48-62]	45 [39-57]		0.132
CD4 lymphocyte count at the time of fecal collection [median (IQR)]	459 [302-669]	240 [203-279]	615 [441-693]		<0.001
HIV transmission [n (%)]					0.125
MSM	31 (63.3)	7 (50.0)	24 (68.6)		
Heterosexual	15 (30.6)	7 (50.0)	8 (22.9)		
Blood products	3 (6.1)	0 (0)	3 (8.6)		
Ethnicity [n (%)]					
Asian	49 (100)	14 (28.6)	35 (71.4)		
cART duration (months) [median (IQR)]	79 [48-119]	59 [45-120]	85 [52-116]		0.550
Nadir CD4 lymphocyte count [median (IQR)]	185 [81-245]	102 [42-140]	204 [125-287]		0.003
Time since nadir CD4 (months) [median (IQR)]	61 [35-75]	51 [16-62]	62 [46-73]		0.135
Prior clinical AIDS [n (%)]	23 (46.9)	10 (71.4)	13 (37.1)		0.030
CVD risks					
Smoking, ever [n (%)]	10 (20.4)	1 (7.1)	9 (25.7)		0.145
Hypertension [n (%)]	8 (16.3)	5 (35.7)	3 (8.6)		0.020
Diabetes mellitus [n (%)]	3 (6.1)	1 (7.1)	2 (5.7)		0.851
Dyslipidaemia [n (%)]	6 (12.2)	1 (7.1)	5 (14.3)		0.491
Body mass index (kg/m^2) [median (IQR)]	23.5 [21.9-25.9]	22.4 [21.0-24.1]	24.2 [22.5-26.4]		0.043
number on cART regimen					
INTSTI [n (%)]	33 (67.3)	11 (78.6)	22 (62.9)		0.289
NRTI [n (%)]	48 (98.0)	14 (100)	34 (97.1)		0.232
NNRTI [n (%)]	6 (12.2)	1 (7.1)	5 (14.3)		0.491
PI [n (%)]	13 (23.5)	2 (14.3)	11 (31.4)		0.219

cART, combination antiretroviral therapy; CVD, cardiovascular disease; IQR, interquartile range; MSM, men who have sex with men; INTSTI, integrase strand transfer inhibitor; NRTI, nucleoside reverse transcriptase inhibitor; NNRTI, nonnucleoside reverse transcriptase inhibitor; PI, protease inhibitor.

*Nonparametric test for trend across CD4 count categories.

TABLE 2 Bacteria taxa ranked within the top 20 by relative abundance in patients with HIV infection

Bacterial taxa	Relative abundance (%)	
	HIV >350	HIV<350
Ranked within the top 20 in all two groups		
p, Firmicutes; c, Clostridia; o, Lachnospirales; f, <i>Lachnospiraceae</i> ; g, <i>Blautia</i>	13.02	10.55
p, Actinobacteriota; c, Actinobacteria; o, Bifidobacteriales; f, <i>Bifidobacteriaceae</i> ; g, <i>Bifidobacterium</i>	12.29	16.12
p, Firmicutes; c, Clostridia; o, Oscillospirales; f, <i>Ruminococcaceae</i> ; g, <i>Faecalibacterium</i>	7.37	5.22
p, Actinobacteriota; c, Coriobacteriia; o, Coriobacteriales; f, <i>Coriobacteriaceae</i> ; g, <i>Collinsella</i>	5.26	2.56
p, Firmicutes; c, Clostridia; o, Lachnospirales; f, <i>Lachnospiraceae</i> ; g, <i>[Ruminococcus]_torques_group</i>	4.35	2.51
p, Firmicutes; c, Clostridia; o, Lachnospirales; f, <i>Lachnospiraceae</i> ; g, <i>Dorea</i>	4.08	2.86
p, Firmicutes; c, Clostridia; o, Lachnospirales; f, <i>Lachnospiraceae</i> ; g, <i>Agathobacter</i>	3.36	5.55
p, Firmicutes; c, Clostridia; o, Oscillospirales; f, <i>Ruminococcaceae</i> ; g, <i>Subdoligranulum</i>	2.71	4.16
p, Firmicutes; c, Bacilli; o, Erysipelotrichales; f, <i>Erysipelotrichaceae</i> ; g, <i>Holdemanella</i>	2.67	1.15
p, Firmicutes; c, Clostridia; o, Lachnospirales; f, <i>Lachnospiraceae</i> ; g, <i>Fusicatenibacter</i>	2.52	4.25
p, Firmicutes; c, Bacilli; o, Lactobacillales; f, <i>Streptococcaceae</i> ; g, <i>Streptococcus</i>	2.35	2.08
p, Bacteroidota; c, Bacteroidia; o, Bacteroidales; f, <i>Bacteroidaceae</i> ; g, <i>Bacteroides</i>	2.21	3.98
p, Firmicutes; c, Clostridia; o, Oscillospirales; f, <i>[Eubacterium]_coprostanoligenes_group</i> ; g, <i>[Eubacterium]_coprostanoligenes_group</i>	1.87	2.16
p, Firmicutes; c, Clostridia; o, Lachnospirales; f, <i>Lachnospiraceae</i>	1.79	3.14
p, Firmicutes; c, Clostridia; o, Lachnospirales; f, <i>Lachnospiraceae</i> ; g, <i>Lachnoclostridium</i>	1.39	1.18
p, Firmicutes; c, Clostridia; o, Lachnospirales; f, <i>Lachnospiraceae</i> ; g, <i>[Ruminococcus]_gnavus_group</i>	1.20	3.92
Ranked within the top 20 only in HIV patients with CD4 counts above 350		
p, Bacteroidota; c, Bacteroidia; o, Bacteroidales; f, <i>Prevotellaceae</i> ; g, <i>Prevotella_9</i>	3.62	1.15
p, Firmicutes; c, Bacilli; o, Erysipelotrichales; f, <i>Erysipelatoclostridiaceae</i> ; g, <i>Catenibacterium</i>	3.44	0.80
p, Firmicutes; c, Negativicutes; o, Veillonellales-Selenomonadales; f, <i>Selenomonadaceae</i> ; g, <i>Megamonas</i>	3.09	0.20
p, Firmicutes; c, Negativicutes; o, Veillonellales-Selenomonadales; f, <i>Veillonellaceae</i> ; g, <i>Megasphaera</i>	1.42	1.03
Ranked within the top 20 only in HIV patients with CD4 counts below 350		
p, Firmicutes; c, Bacilli; o, Lactobacillales; f, <i>Enterococcaceae</i> ; g, <i>Enterococcus</i>	1.49	4.51
p, Firmicutes; c, Clostridia; o, Lachnospirales; f, <i>Lachnospiraceae</i> ; g, <i>Anaerostipes</i>	1.92	3.74
p, Firmicutes; c, Clostridia; o, Lachnospirales; f, <i>Lachnospiraceae</i> ; g, <i>Coprococcus</i>	1.13	1.47
p, Firmicutes; c, Clostridia; o, Oscillospirales; f, <i>Ruminococcaceae</i> ; g, <i>Ruminococcus</i>	0.86	1.30

p, phylum; c, class; o, order; f, family; g, genus.

HIV>350, HIV patients with CD4 counts above 350 cells/ μ L; HIV<350, HIV patients with CD4 counts below 350 cells/ μ L.

Figure 1A: Alpha diversity (observed OTUs and chao1) in the high and low CD4 groups

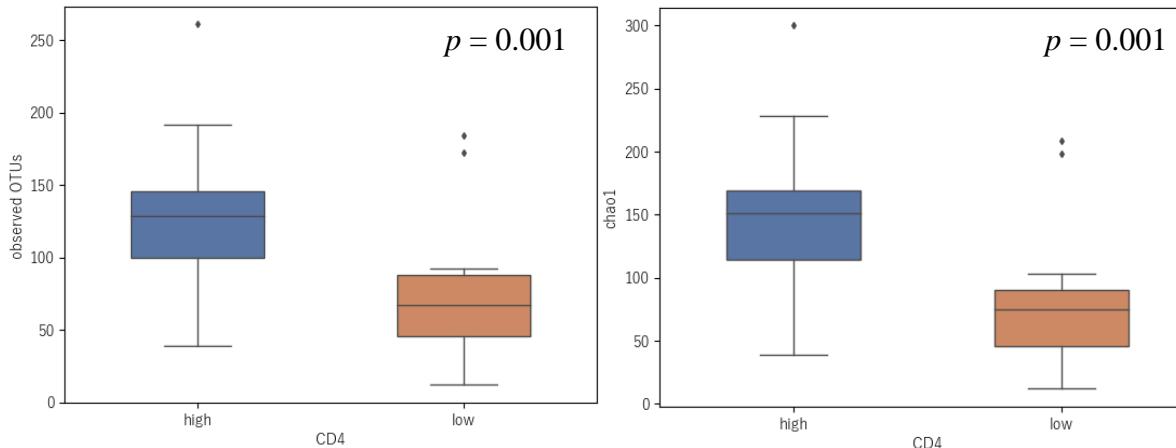

Figure 1B: Correlation between alpha diversity (chao1) and CD4 or nadir CD4 in HIV patients

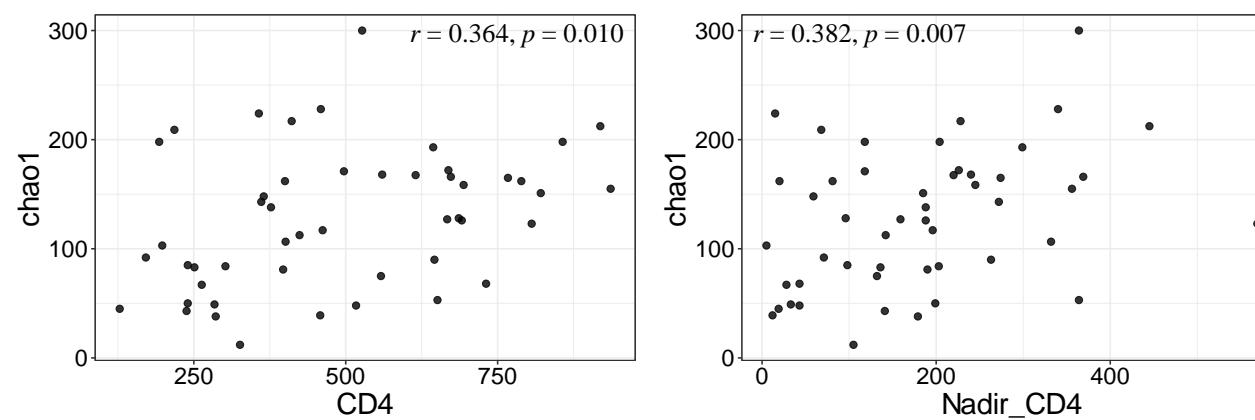

Figure 1C: Beta diversity comparisons between the low and high CD4 groups (Unweighted UniFrac : $p = 0.002$)

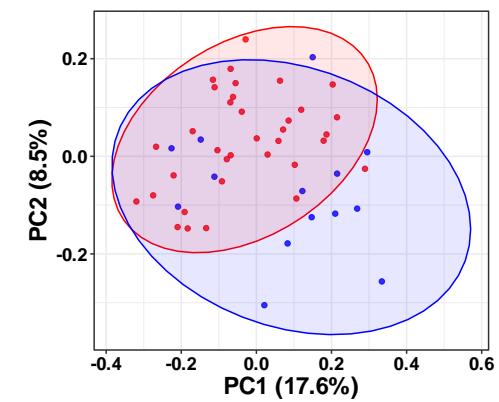

Figure 2: Heat map of significantly different bacterial flora composition between the low and high CD4 groups. Color intensity indicates row-scaled (z-score) relative abundance.

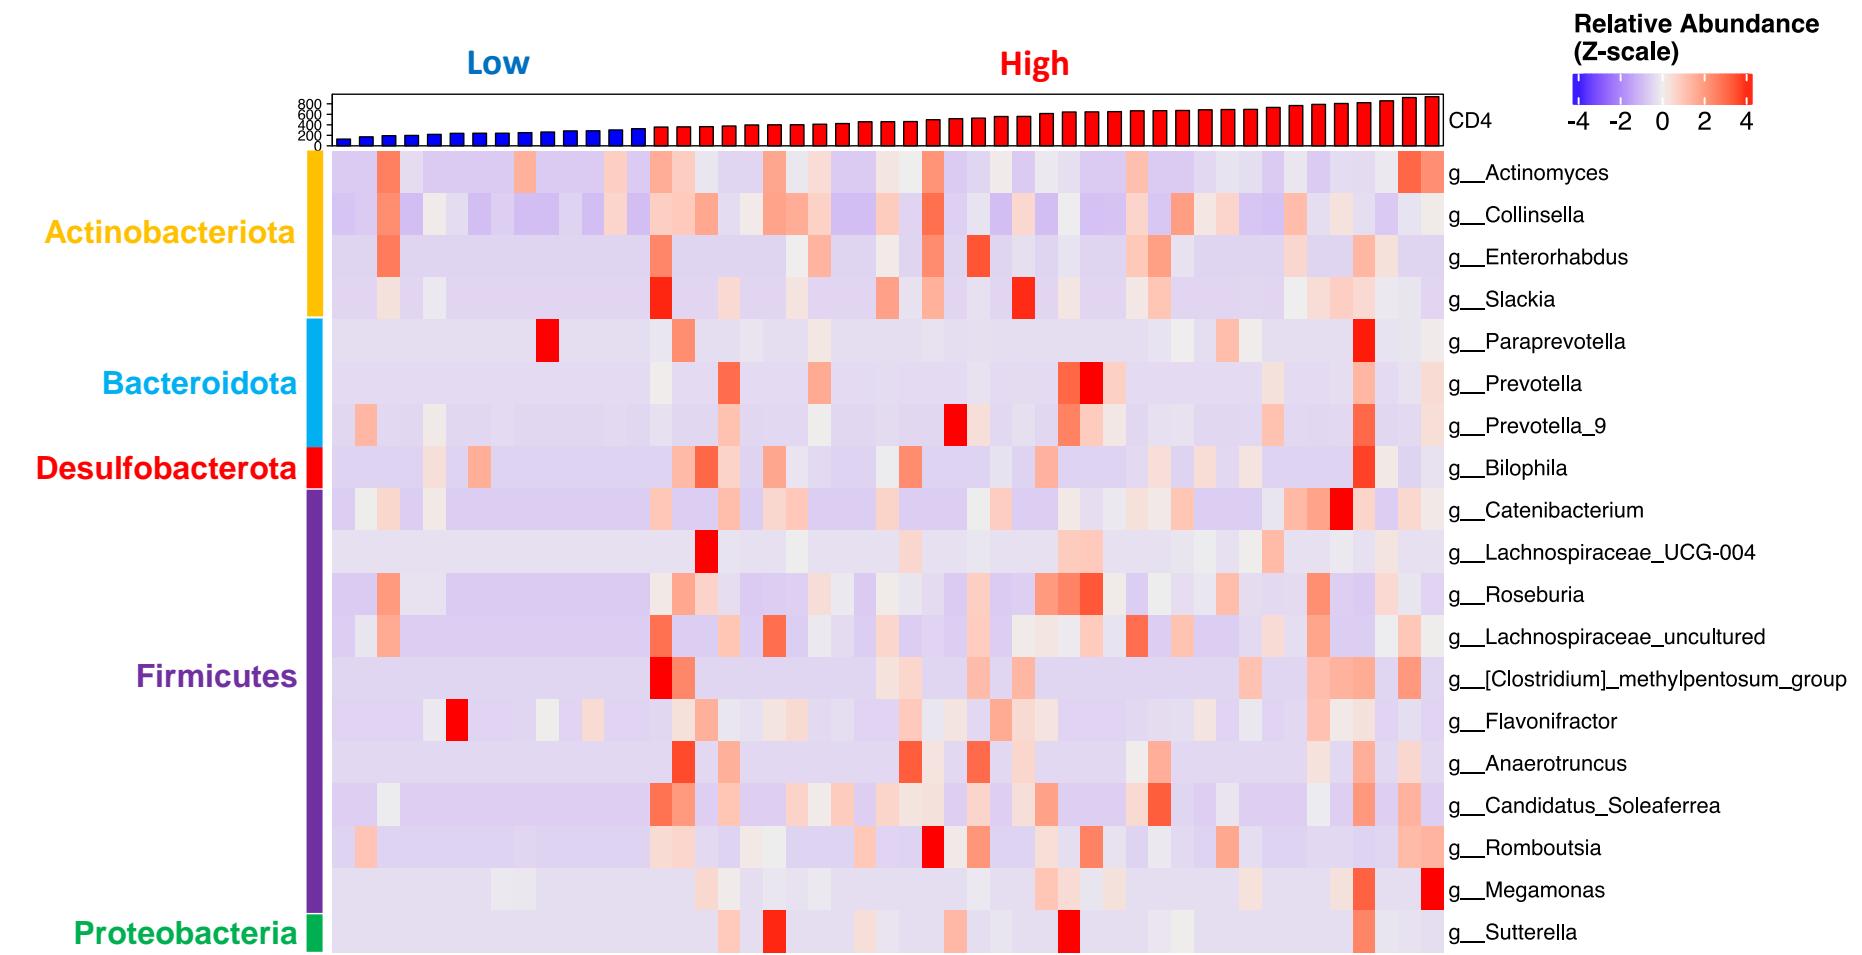

Figure 3A: The amount of organic acids in feces in the low and high CD4 groups.

The number above each bar is the *p*-value between the two groups.

Supplementary Table 1

Bacteria taxa ranked within the top 5 phyla by relative abundance in patients with HIV infection

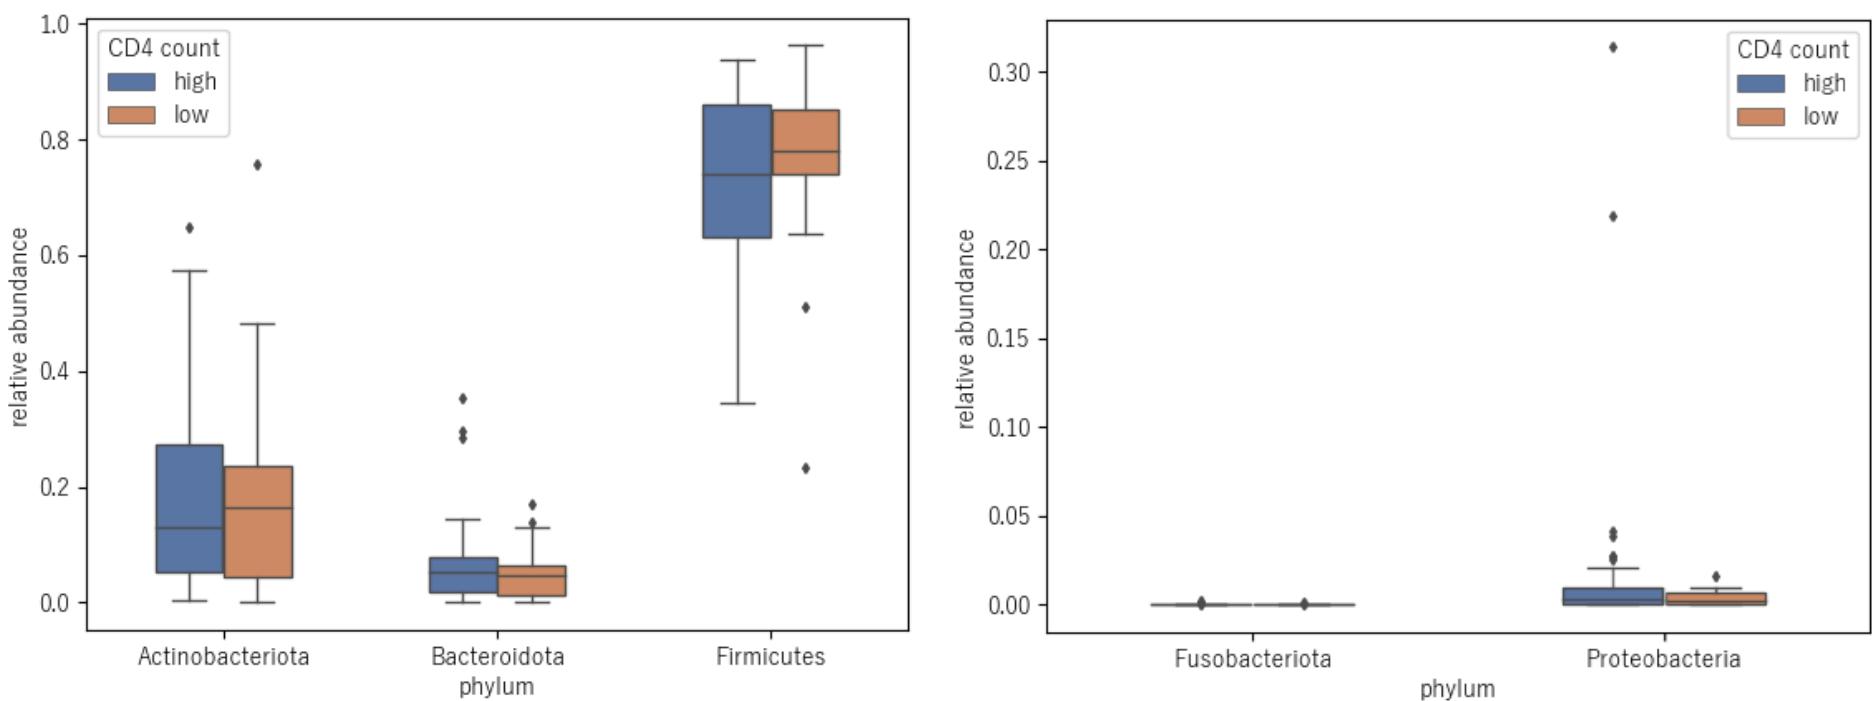

Bacterial taxa	Relative abundance (%)
	all
Phylum	
Firmicutes	72.58
Actinobacteria	18.85
Bacteroidota	6.59
Proteobacteria	1.71
Fusobacteriota	0.02

Supplementary Table 2

Correlations between the bacteria species treated in Figure 3 and various organic acids

	Succinic acid		Lactic acid		Formic acid		Acetic acid		Propionic acid		Isobutyric acid		Butyric acid		Isovaleric acid		total organic acids
